

TRODAT - ALWAYS AN ORIGINAL:

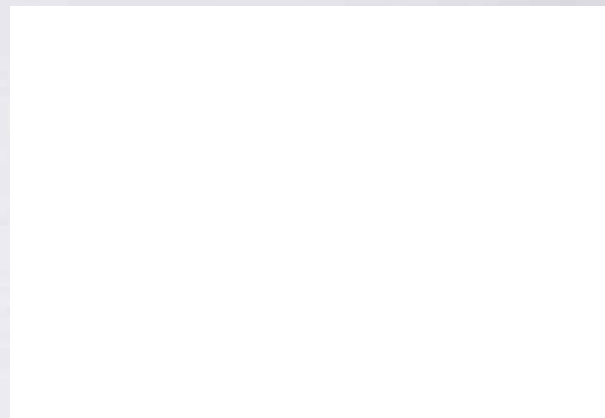

Trodat products are thoroughly original: More than 40 years ago the stamp industry was revolutionised by the introduction of the first plastic self-inking stamp (the Printy 1). To this day more than 300 million Printy stamps have been sold worldwide, followed by a stream of innovative products from different product groups.

With all of its products and subsidiaries Trodat offers everything in the world of stamps. This value-added philosophy has made business partners and customers all over the world happy for many years.

Trodat stamp products are innovative and suitable for all applications. In order to offer stamp products that always produce clean and beautiful impressions, the sister company Trotec Laser GmbH develops the right technology for stamp producers. The in-house shop solution uTypia can be used by both business and private customers to customise and buy the perfect stamp online, which, since the launch of Trodat Multi Color, can even be multicoloured!

Continuity, trust and innovation are characteristics of the cooperation that exists between Trodat and its sales partners in more than 150 countries worldwide and the same has been true for more than 100 years.

CREATING ORIGINALS

After the overwhelming success of the Original Printy 4.0, Trodat has extended its range of products which offer climate neutrality as standard, thus maximising the positive impact on the environment. Since 2013, Trodat produces more than 70 of its best-selling products with the maximum, technically possible content of recycled plastic to reduce their CO₂ footprint.

Only in the last step, the remaining, inevitable CO₂ footprint of these products is offset by investing in Gold Standard climate protection projects recommended by the WWF[®]. As a result, Trodat offers its best-selling products climate-neutral, as standard!

THE WAY IT WORKS

TAILORMADE

Individual colour and design requirements are a Multi Color Impression specialty. The text and logo fields can be arranged as required. The resulting fields in the ink cartridge are then inked automatically with the selected colours.

PRECISION

The laser cuts the ink cartridge with precision and seals the colour fields at the same time. This prevents the contamination of each of the individual colour fields.

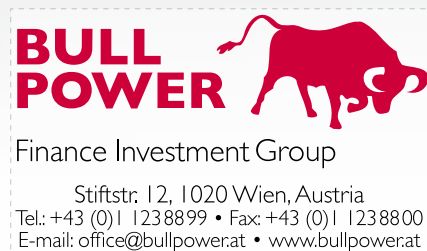

QUALITY

The Multi Color Jet inks each of the individual colour fields with the optimum amount of ink. The result is a set of clean impressions to the usual Trodat level of quality.

ONE COMPUTER - MANY POSSIBILITIES:

The new Trotec Multi Color Jet is operated using the same PC as you already use to control your Trotec laser.

TRIED AND TESTED TECHNOLOGY:

The Trotec Laser Speedy 100, Speedy 300, Speedy 400 or Rayjet series form the technological basis for the production of Trodat Multi Color stamps. Special, un-inked ink cartridges - matching precisely the impression design - are cut by laser to match each of the individual colour fields.

NOW NEW AND SIMPLIFIED:

The Multi Color ink cartridge is now inked using the new Trotec Multi Color Jet. Revolutionary: You no longer need to re-tool! All 15 colours are already installed in the Multi Color Jet.

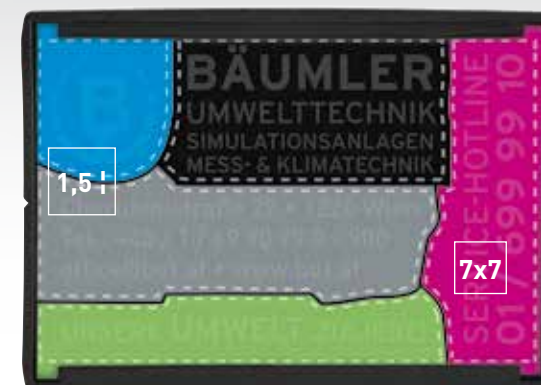

So, while your laser is in the process of engraving the textplates, the Multi Color Jet is already busy inking the ink cartridges. This allows you to produce more of the unique Multi Color stamps quicker and in a more cost effective manner.

WE ASKED – YOU DECIDED

Numerous surveys of rubber stamp makers were carried out to identify 'What do you expect from the ideal stamp?' The valuable results have had a significant impact on the development of the Original Printy 4.0.

1. Simple mounting of text plates thanks to the raised position of the text plate holder

2. Convenient detachable index window which is symmetrical with a large grip

3. Lightweight & compact, which makes it the perfect stamp for when you are on the move

4. Easy to customise! Countless options for your logos and individual prints on the stamp housing

WHAT DO YOUR CUSTOMERS WANT TO BUY?

The Original Printy 4.0 is not just about impressing rubber stamp makers. It also needs to sell well. That's why we also asked users what, in their opinion, makes a good stamp. There were some interesting responses. And we incorporated these ideas when we developed the Original Trodat Printy 4.0.

1. Clean replacement of ink cartridge thanks to special grip zone

2. Exact placement of impressions thanks to the panoramic viewing window

3. Unbelievably small & light, perfect when you are on the move

4. Climate-neutral. As standard.

TRODAT PRINTY TEXT STAMPS

The comprehensive Printy range offers numerous imprint sizes. The stamps impress with optimal functionality, simple and clean ink pad replacement and outstanding imprint quality. Furthermore, the bestsellers from this range are climate-neutral.

Are you looking for an incredibly small and light stamp? Or an eco-friendly one? Or should mounting the text plates be particularly easy? Forget the "or" and choose the Original Printy 4.0! Trodat as the mother of modern self-inking stamps is offering the most important Trodat Printy sizes in its latest generation Original Printy 4.0.

TRODAT PREMIUM FLASH

With Trodat's new Pre-inked Flash lines you get thousands of crisp and clear impressions no matter if bold logos or fine lines. In addition they can be re-inked easily for thousands more.

Pre-inked stamps are very popular for large impressions, because the housing of the stamps is relatively small despite the large imprint area. All Trodat Premium Flash models promote dry cartridge inking concepts for efficient inventory management.

WHAT ARE THE BENEFITS OF NEW MAXLIGHT S-STYLE, PSI E-STYLE AND SUPER SLIM?

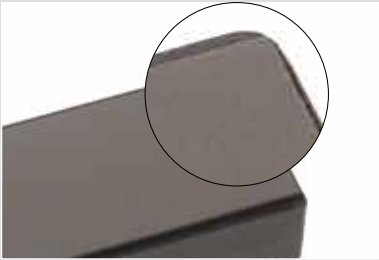

Improved Die Box:
Foam and cartridge come already glued into the die box – no moving parts.

Convenient Inking:
Fast & clean – no accessory or scale needed. The patented dry cartridge concept allows high inventory flexibility.

1-step Assembly:
The new snap-in die box provides the simplest assembling possible.

Larger Impression Area:
Cutting and sealing of foam is done by new laser technology – so no space is wasted.

New Trodat Flash Machine:
Quick & easy operation – whole die box can be flashed at once.

Fast Ink Migration:
Trodat Premium Ink is indelible and migrates under 1h. It guarantees best impression results no matter if bold logos or fine lines.

For ordering and delivery of these products, please contact your Trodat sales consultant.

TRODAT INK CARTRIDGES

By using Trodat replacement pads you can be sure that your stamps will always deliver uniform and clean impressions. Both the pad material and the ink colour have been continuously perfected over many years of research. Replacement pads are available for all Professional, JustRite, Printy and Mobile Printy models. The standard range of Trodat stamp inks is indelible in accordance with DIN ISO 14145-2 and therefore ensures perfect imprint quality. In addition, the ink colour black fulfils crucial permanence and durability properties according to the DIN ISO 11798 Archivability Standard such as colour intensity (optical density) and appearance of the typefaces, lightfastness, water resistance, abrasion resistance, heat resistance and influence of the printed lettering on paper strength.

Three overlapping rectangular blocks of color. On the left is an orange block. In the center, overlapping the orange one, is a dark teal block. On the right, overlapping the teal block, is a green block.

With Trodat laser rubbers you choose the best engraving results and highest productivity.

The results are so convincing because coordinated research work is carried out into all three segments: stamp components, laser engraving equipment and text plate materials. It is the combination of these three well-coordinated components that creates the unique features that allow Trodat customers to clearly stand out from the competition.

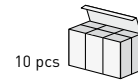

Trodar laser rubbers are completely harmless with regard to occupational health and safety. During the entire manufacturing process, levels fall significantly below the stringent European limits on maximum workplace concentration (MAC).
